

# CIRCULAR GRADER WITH BUCKETS

## PRECISION - PERFORMANCE - RELIABILITY

The Hardouin circular grader with buckets, available with manual or semi-automatic loading, has been specially designed for accurate and fast grading of oysters.

Manufactured in 316L stainless steel, it guarantees excellent corrosion resistance and perfect adaptation to marine and conchyculture environments.

Thanks to its high-precision grading system, this machine ensures reliable grading while maintaining a high production rate.

### HIGH-QUALITY MANUFACTURING

Constructed from 316L stainless steel for optimal corrosion resistance and easy maintenance.

### HIGH-PRECISION GRADING

Latest-generation grading system ensuring reliable and consistent results.

### HIGH PERFORMANCE

High production rate for maximum efficiency.

### COMPLIANT WITH CE STANDARDS

High-tech equipment built in accordance with current CE standards.

## PRODUCTION PERFORMANCE

9 OUTLETS	8,000 to 8,500 oysters / hour
12 OUTLETS	12,000 to 13,000 oysters / hour
18 OUTLETS	14,500 to 15,500 oysters / hour
22 OUTLETS	18,000 to 19,000 oysters / hour

Hardouin's circular grader with buckets is today the only machine with a true integrated industrial process.

It benefits from high-technology equipment compliant with CE standards, ensuring performance, safety, and reliability.

## PRODUCTION MONITORING & MAINTENANCE

Our graders allow:

- Real-time production monitoring
- Traceability of batches
- Remote maintenance thanks to remote access

**OPTION**

## MODERNISATION OF EXISTING MACHINES

Customers who purchased a Hardouin grader with buckets between 1999 and 2003 can have their machine refurbished with a modern industrial automation system, in order to improve performance and extend the life of their equipment.

## INDUSTRIAL DESIGN AND ROBUSTNESS

Designed for intensive use, Hardouin's circular grader with buckets guarantees high durability and maximum availability in the most demanding environments.
