

TUBULAR ROTARY CRIB WASHER

INOX
316L
HIGH QUALITY
★★★

The tubular rotary crib washer is designed to ensure the washing and efficient cribrage of oysters while respecting their integrity.

Its robust and high-performance design allows for consistent and reliable cribrage, perfectly adapted to the needs of shellfish farming professionals.

KEY FEATURES

STAINLESS STEEL CONSTRUCTION

Construction in stainless steel for excellent resistance in marine environments.

QUIET OPERATION

Quiet operation for optimal working comfort.

COST-EFFECTIVE

Lower operating costs for excellent value for money.

EFFICIENT AND CONSISTENT CRIBRAGE

Efficient and consistent cribrage for optimal sorting of oysters.

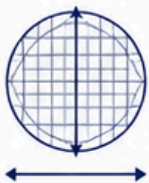

GENTLE ON PRODUCT

Respects the product: no damage to oysters, preserves their quality.

ON-DEMAND CRIB SIZES

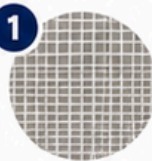

Crib sizes available on demand, from T4 up to larger commercial sizes.

MULTIPLE MESH SIZES FROM 1 TO 4, ON DEMAND

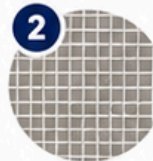

Mesh sizes from 1 to 4 available on demand to suit your specifications and sorting requirements.

1

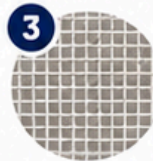

FINE MESH
Small size

2

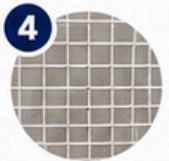

MEDIUM MESH
Medium size

3

COARSE MESH
Large size

4

EXTRA COARSE MESH
Extra large size

EFFICIENT WASHING AND SORTING

This machine offers an economical, reliable and durable solution for washing and sorting oysters, meeting the requirements of shellfish farming professionals.

ROBUST AND DURABLE

Robust design for maximum longevity, even in demanding marine conditions.

EASY MAINTENANCE

Simplified access for fast and easy cleaning and maintenance.

CONSISTENT PERFORMANCE

Consistent and reliable performance for optimal productivity.

ADAPTED TO PROFESSIONALS

Designed to meet the specific needs of shellfish farming professionals.
