

# SIEVE WASHER FOR NURSERY

EFFICIENT NURSERY SIEVE CLEANING

## THE IDEAL SOLUTION FOR OPTIMAL PREPARATION OF NURSERY SIEVES

The sieve washer is designed to ensure efficient cleaning of the nursery sieves, removing impurities, algae, mud and other residues.

Thanks to a rotary system, the machine enables homogeneous cleaning of the sieves to ensure optimal operation and effective preparation for nursery use.

Robust and suitable for marine environments, the machine is ideal for hatcheries, nurseries and shellfish farming operations.

## FEATURES

### ROBUST STRUCTURE IN STAINLESS STEEL

Designed to withstand marine conditions and corrosion.

### EFFICIENT SIEVE CLEANING

Rotary or vibrating system ensures complete and thorough cleaning.

### REMOVAL OF IMPURITIES

Effectively removes algae, mud, sand and other residues.

### OPTIMAL PREPARATION

Clean and ready-to-use sieves for efficient nursery operations.

### EASY MAINTENANCE AND HIGH DURABILITY

Simple design for quick maintenance and long service life.

### SUITABLE FOR PRODUCTION LINES

Easily integrates into your existing installations.

The sieve washer ensures clean and high-performance nursery sieves, optimizes nursery preparation and increases overall productivity.

### IDEAL FOR

- Hatcheries
- Shellfish nurseries
- Nursery operations
- Marine farming

### PERFORMANCE

Efficient cleaning for optimal operation and regular flow in accordance with the requirements of professionals.

### CLEANLINESS AND RELIABILITY

Clean sieves, reliable and durable operation for consistent, high-quality production all year round.
