

HOPPER WASHER

LOADING SYSTEM

THE IDEAL SOLUTION FOR FEEDING YOUR SORTING OR GRADING LINE

The hopper washer is designed to wash oysters efficiently while ensuring a regular and continuous feed of your sorting or grading equipment.

Robust, quiet and high-performance, it integrates perfectly into your production line for optimal daily operation.

KEY BENEFITS

QUIET OPERATION

Discreet operation for optimal working comfort.

IDEAL FOR FEEDING YOUR LINE

Regular and continuous feeding of your sorting or grading line.

TAILORED TO YOUR NEEDS

Design adapted to your requirements and your installation.

OPTIMIZED WATER CONSUMPTION

Uses 20 to 40 m³/hour of water depending on model.

INOX 316L HIGH RESISTANCE

Made of 316L stainless steel for excellent corrosion resistance in marine environments.

USE

Perfectly suited for:

- ✓ Feeding a sorting line
- ✓ Feeding a packaging line
- ✓ Integrating into a complete production line

ROBUST AND DURABLE

Designed to last in the most demanding conditions.

COST-EFFECTIVE

Lower operating costs and optimized water consumption.

EASY MAINTENANCE

Simplified access for quick and efficient maintenance.

RELIABLE PERFORMANCE

Efficient washing and regular feeding for optimal productivity.
