

WATER SPAT SIEVING

PRECISE AND GENTLE SIEVING WITH WATER

THE IDEAL SOLUTION FOR EFFICIENT AND RESPECTFUL SHELLFISH SIEVING

The water spat sieving machine is designed to ensure precise and consistent sieving of shellfish using a gentle water flow, while preserving the fragility of the shellfish.

Thanks to its high-performance sieving system, it provides homogeneous sieving while minimizing stress and impact on young shellfish.

Robust and reliable, the machine is ideal for hatcheries, nurseries and shellfish farming operations.

FEATURES

WATER SPAT SIEVING

Gentle water flow ensures effective sieving while preserving the fragility of shellfish.

PRECISE SIEVING

High-performance sieving system for accurate and consistent results.

ADJUSTABLE WATER FLOW

Water flow control adapted to different species, sizes and sieving requirements.

ADAPTABLE LOADER

Option to add a loader to facilitate continuous feeding of the machine.

ROBUST DESIGN

Stainless steel construction for marine environments and long-lasting durability.

The water spat sieving machine optimizes shellfish sieving with a gentle water flow, improves productivity and helps preserve the quality of young shellfish.

PRESERVES QUALITY

- Minimizes stress
- Respects shellfish fragility
- Improves survival rate

PERFORMANCE

- Precise and homogeneous sieving
- Adaptable to all volumes and sieve sizes
- Optimized productivity

ROBUST AND RELIABLE

- Aluminium construction
- Corrosion-resistant materials for marine environments
- Easy to maintain
